Green Solutions

Eco+ technology from Optoma increases our commitment to reducing the impact we all make on the environment

Eco+ Mode

Saving energy saves money! Eco+ technology reduces the power consumption to as little as 30%. This intelligent feature also has a positive effect on the lamp life, increasing it up to 70% while lowering the total cost of ownership and reducing maintenance.

Auto Power Off

There may be instances when the projector is left running when not in use. To help save energy if the projector is left running and no source is detected, the "Auto Power Off" feature automatically turns off the projector after a set period of time.

Eco AV Mute

Stay in control of your presentation with the Eco AV mute feature. Direct your audience's attention away from the screen by blanking the image when no longer needed. This also instantly reduces the power consumption to 30%, further prolonging the life of your lamp.

Eco AV mute off 100% power consumption

Eco AV mute on 30% power consumption

Environmentally Friendly

To achieve the maximum 6500hrs[2] lamp life, the projector should be operating in Eco+ mode and the auto power off feature should be enabled to automatically switch off the projector if it is accidentally left on. Enabling the <0.5W standby mode ensures the minimum energy consumption when the projector is not switched on.

We know that improving our products is the best way to reduce our impact on the environment. That's why at Optoma we design our products to have a long usable life, use fewer materials, ship with the minimum packaging and be free of all possible toxic substances. Naturally, energy efficiency and being recyclable are built in at the design stage. With each new product, we strive towards minimising our environmental impact.

Bright, Clear, Focused Images

Bright 2800 ANSI Lumens, Perfect for projecting in lights on environments. And with DarkChip3™ technology from Texas Instruments combined with Eco+ technology produces a stunning 13,000:1 contrast ratio for pin sharp graphics and crystal clear text. Crisper whites, ultra-rich blacks make images come alive and text easier to read - ideal for business and education presentations.

Colour Guarantee

We are so confident that the W290 image colour quality will remain as good as the day you bought it that Optoma will guarantee it for five years.

Amazing Colours

The W290 incorporates BrilliantColor™ technology to produce stunningly bright images with perfectly balanced life-like colours.

Control

The extensive RS232 command set makes it simple and easy to control the W290 with any control system.

Full 3D

Using the inherent speed of DLP technology, The Optoma W290 Full 3D projector can display true 3D content form almost any 3D display device, including 3D Blu-ray, PS3, Xbox and Sky3D.

Audio Performance

Built-in 2W speaker offers excellent audio support. The W290 is easy to set up without the need for costly external speakers

Quick Resume

Save time by not waiting for the projector to cool down before it can power up again. If the projector is accidentally turned off, this feature allows the projector to be instantly powered on again, if selected within a period of 100 seconds.

Rapid Off

It takes less than 10 seconds for the projector to power up and shutdown, saving both time and energy.

Wireless Presenting (optional extra)

Making presentations couldn't be easier using the optional wireless features of the W290. Using the Wireless Adapter you can connect and display presentations and video material wirelessly from a laptop, PC or mobile device. (Additional power required)
